

The Department of Energy at Rocky Flats Plant invites you to comment.

Resource Conservation and Recovery Act (RCRA) Permit Modification Request 5

The U.S. Department of Energy (DOE) invites the public to offer comments on a request submitted by DOE and EG&G Rocky Flats to the Colorado Department of Health (CDH) for a Class 3 modification to the Rocky Flats Plant's Resource Conservation and Recovery Act (RCRA) Permit. The RCRA permit currently regulates nine hazardous and combined hazardous and low-level radioactive (mixed) waste container storage units at Rocky Flats. Class 3 modifications are classified as changes which substantially alter the facility or its operation.

The Training section of the RCRA permit presently requires DOE to prepare position descriptions for all employees to determine which employees require hazardous waste training. In this permit modification request the DOE is instead proposing to provide on-the-job and classroom hazardous waste training to all plant personnel.

The DOE has requested temporary authorization from CDH to allow the facility to continue to train employees according to the existing programs until the proposed program is implemented.

A 60-day comment period for the permit modification request begins February 4, 1992, and ends April 4, 1992. Written comments will be accepted throughout the comment period. A public information meeting to be held on February 13, 1992, will discuss this Class 3 permit modification request as well as an earlier Class 2 permit modification request (#4).

This is the fifth permit modification request since the permit became effective October 30, 1991. Questions about this or other modification requests should be directed to Beth Brainerd, Public Information Officer, U.S. Department of Energy, Rocky Flats Office, 303-966-5993.

PUBLIC INFORMATION MEETING
Thursday, February 13, 1992
7:00 p.m. to 9:00 p.m.
Westminster Recreation Center
10455 Sheridan Boulevard
Westminster, CO

The RCRA permit modification request and supporting documents are available at the following locations:

U.S. Environmental Protection Agency
